## Personality Report

Text of 1,167 words in English, dated 13/02/2021

<b>Subject:</b>	Nuevo de prueba
<b>Birth Year:</b>	2017
<b>Nationality:</b>	Costa Rica
<b>Country Of Residence:</b>	Spain
<b>Gender:</b>	Male
<b>Education Level:</b>	Upper secondary
<b>Occupation:</b>	Student

## Personality Analysis

Factors and facets are valued separately, so factors are not necessarily an average of the facets they include.

The results show the individual score and the score compared to a world sample (percentiles). The percentiles are the score for which the trait and facet ranges are described: below 25 are low and above 75 are high.

If you are not a professional used to interpreting psychometrics from the OCEAN model, below you will find non-exhaustive information to understand the meaning of the scores, which you should interpret with the help of professionals:

[?](#) [Openness](#) [Conscientiousness](#) [Extraversion](#) [Agreeableness](#) [Neuroticism](#)

Regarding the relationships between traits, the adjectives found at the crossings between the high and low ranks of each trait illustrate some likely descriptors.

[?](#) [Crossovers between traits](#)

## Personality (Big 5)

	Individual	Percentile
<b>Openness</b>	<b>80.94%</b>	<b>97.16%</b>
Adventurousness	53.43%	79.65%

Susceptible to stress	36.13%	4.75%

Values over 75%

Values under 25%

## Needs

Fundamental intrinsic properties associated with each person, the wishes they want to fulfill and influence their behavior.

An above-average score of 0.5 indicates an above-average trend for a characteristic. A score equal to or greater than 0.75 indicates easily discernible aspects of the characteristic. They are displayed in order from highest to lowest score.

 [Needs](#)

Priority	Need
1st	Structure
2nd	Curiosity
3rd	Stability
4th	Closeness
5th	Harmony
6th	Practicality
7th	Challenge
8th	Excitement
9th	Ideal
10th	Liberty
11th	Self-expression
12th	Love

Values over 75%

Values under 25%

## Values

Beliefs that influence decision making. They are quantified so that they can be ordered by their relative importance for the person analyzed.

[Values](#)

Priority	Value
1st	Conservation
2nd	Openness to change
3rd	Self-transcendence
4th	Hedonism
5th	Self-enhancement

Values over 75%

Values under 25%
